# OBANIJESU ADUFE

Frontend Developer

Osogbo, Nigeria • +234 814 691 7054 • Email • LinkedIn • GitHub • Portfolio Website

## SUMMARY

Frontend developer who has been coding since 2017 and building professionally since 2021, across fintech, embedded systems, and agri-tech. Strong in React, Next.js, TypeScript, and GSAP animation, with experience building complex interfaces such as financial dashboards, and comfortable building the backend when a project needs it. Currently leading development of Oasis, a learning platform launching in November 2026.

## SKILLS

**Frontend:** React, Next.js, TypeScript, JavaScript, HTML5, CSS3, TailwindCSS, GSAP, Zustand

**Backend & Databases:** Node.js, Firebase (Auth, Firestore)

**Embedded:** Arduino, ESP8266/NodeMCU, C

**Tools:** Git, GitHub, Figma, Docusaurus, AI-assisted development

**Familiar with:** Ionic, Capacitor, Express.js, MongoDB, Python, PHP, MySQL

## EXPERIENCE

**TEDxOsogbo**, Osogbo, Nigeria **Jan 2026 – Jul 2026**

*Web Development Team Lead (Volunteer)*

- Led development of the official TEDxOsogbo 2026 website (tedxosogbo.com.ng) using Next.js and TypeScript.
- Integrated third-party ticketing platforms (Xara AI and Tixvnt) to handle ticket sales and payments for about 200 participants.

**Lint Universal Technologies Limited**, Plateau State, Nigeria **Nov 2024 – May 2025**

*Associate Frontend Developer*

- Rebuilt the customer dashboard with Next.js and TypeScript as the sole frontend developer, delivering virtual card creation, multi-step onboarding with validation, wallet management, payroll processing, and bill payments.
- Set up a Docusaurus documentation site that gave the team a single reference for system architecture and implementation details.
- Worked day to day with product managers, designers, backend engineers, QA testers, and the mobile team to take features from design to release.

**HNG Tech Limited**, Lagos, Nigeria **Jul 2024 – Aug 2024**

*Frontend Developer Intern*

- Finished among the top 523 of 24,123 participants in HNG Internship 11 (finalist certificate).
- Worked on Tifi, a live AI-powered platform built with Next.js and TypeScript that turns scripts into videos, images into videos and talking avatars, and summarizes PDFs and podcasts.
- Led the shift of most of the application from client-side to server-side rendering, improving SEO and performance, and contributed to the admin dashboard.

**Kadosh Mechatronics**, Ondo State, Nigeria **Aug 2023 – Jun 2024**

*Embedded Engineer & Web Developer (NYSC placement)*

- Developed Arduino and ESP8266/NodeMCU firmware for embedded projects including home automation, a smart dust extractor, a massager, and a fire and gas detection system, interfacing sensors, relays, and motors.
- Built web interfaces served directly from the ESP8266 for remote monitoring and control of connected devices.
- Built an in-house inventory management system with React and Firebase for tracking components across projects.
- Taught web development and embedded systems and mentored junior team members.

**Oluadepe Farms Nigeria Limited** **Mar 2023 – Sep 2023**

*Frontend Developer Intern*

- Contributed to a React and Electron desktop application supporting farmers with inventory tracking and supplier coordination.
- Developed the farmer registration module and the pond management features.

**Naijaspirit Multimedia**, Osun State, Nigeria **Jun 2021 – Sep 2021**

*Full Stack Web Developer*

- Built a React and PHP/MySQL web application for online voting, event ticketing, and opinion polling that handled 23,000+ user visits across multiple events.
- Integrated Paystack and Flutterwave payment APIs to process votes and ticket purchases.
- Built an admin dashboard for event organizers to track sales, vote counts, and revenue.

## PROJECTS

**Oasis** | View project **Jul 2026 – Present**

*Lead Developer & Curriculum Designer | Launching November 2026*

- A learning platform built to help learners understand why concepts work, not just memorize them, starting with first-year students at Osun State University.
- Built a student-facing mobile/PWA app and an admin workspace for creating, previewing, organizing, and publishing lessons.
- Developed an interactive lesson player with graded activities, mathematical content rendering, diagrams, and learner progress tracking.
- Implemented a lesson editor with a graph-based canvas, validation, undo/redo, draft recovery, student preview, and version history.
- Connected the apps through a TypeScript API with Firebase authentication and Firestore-backed curriculum and lesson workflows, sharing curriculum, editor, and lesson-player packages across the mobile app, admin app, and API.

  **Tech:** React, TypeScript, Ionic, Capacitor, Next.js, Firebase, Firestore, Cloudflare Workers

**Creative Web Animation Projects** | Portfolio website

- Built landing-page recreations of award-winning sites, focused on smooth GSAP animation, responsive layouts, and interactive elements.

  **Tech:** React, Next.js, Vite, TypeScript, TailwindCSS, GSAP

**Typing Web Application** | View project

- Built a Mavis Beacon-inspired typing app with a scoreboard, progress chart, and background music.

  **Tech:** React, Express.js, MongoDB

## CERTIFICATIONS

| | |
|---|---|
| AI for Developers with GitHub Copilot, Cursor AI & ChatGPT, Udemy | Mar 2026 |
| The Complete Python Developer, Udemy | Feb 2026 |
| Pair Programming with AI, LinkedIn Learning | Mar 2025 |
| React: Design Patterns, LinkedIn Learning | Feb 2025 |
| Advanced TypeScript Concepts, LinkedIn Learning | Feb 2025 |
| Developing for Web Performance, LinkedIn Learning | Jan 2025 |

## EDUCATION

**Postgraduate Diploma, Computer Science** (in progress), Osun State University, Osogbo **2025 – Present**

**B.Eng. Mechanical Engineering**, Second Class Honours (Upper Division), Osun State University, Osogbo **2017 – Jan 2023**
